HEALTH CARE CENTRE

The health and well-being of the Atria University community are supported through a dedicated on-campus medical facility equipped to provide immediate healthcare assistance. Students, faculty, and staff have access to primary medical care, routine health consultations, and first-aid services for minor illnesses and emergencies. To ensure comprehensive medical support, the University has partnered with a nearby multispecialty hospital, enabling quick access to specialized treatment and emergency care whenever required.

Atria University also recognizes the importance of mental and emotional wellness as an integral part of student life. Professional counselling services are available to provide guidance, emotional support, and a safe space for individuals seeking assistance, contributing to a healthy, inclusive, and supportive campus environment.

Campus Doctor: Dr. Winne Evangeline
